## PERGOLOUVER The Exclusivity of Class

Designed to offer a distinctive waterproof shading solution to the most sophisticated demand for outdoor luxury protection, Pergolouver is a self-standing or wall connected horizontal system whose top is able to be adjusted for natural light and ventilation.

Its aluminum elements are fully powder coated, and its slats allow a rotation between 0 and 140 degrees with the possibility to select any desired intermediate position to better respond to any specific light direction.

Its perimeter is a hidden gutter connected to its uprights that also act as vertical drain sprouts. The motorized rotation of its

slats offers sun or rain protection making any covered area always enjoyable.

Its slats are provided with a rubber gasket that guarantees waterproof protection when the slats are fully closed.

Pergolouver can be produced as a maximum 14.5' width and 20' projection single unit with only four corner uprights or it can reach a 26' projection with an intermediate upright. Side by side units can be combined to cover any proposed area.

Pergolouver is offered motorized with a low voltage motor and its 8" deep perimeter is perfect to receive sun or mosquito rolling screens in their elegant cassettes to provide privacy.

### Product Features

#### **Expandable.**

As part of the patio system collection designed by Alutex, also Pergolouver offers the possibility to install side rolling curtains in cassette to create a fully protected outdoor environment.

#### **Safe.**

Either if you chose sunscreen drop curtains for sun or privacy or mosquito screens for insect protection, side curtains installed along Pergolouver's perimeter represent the perfect completion of this self-standing modern pergola.

#### **Elegant.**

Designed with particular attention to the details for its components, Pergolouver is a highly sophisticated product for outdoor luxury protection without compromising elegance.

#### **Dependable.**

Pergolouver is the perfect complement to selected outdoor areas to extend social gatherings or to create new separate personal spaces for privacy or leisure.

Custom Frame Color Any RAL color (on request)  
 Frame Warranty 5 Years on structural parts

CAUTIONARY AND IMPORTANT OPERATING INFORMATION: Modern pergolas even if waterproof are intended for shade and rain protection only. They are designed to be retracted under snow and ice conditions. They are not designed to withstand snow. During those times, they must be fully retracted (the slats must be placed vertically) to prevent damages not covered by warranty.
