VISTA

Discrete protection

Vista is an Alutex cassette retractable curtain for wind and rain protection in vertical openings of pergolas, patios, verandas and windows in general.

Designed as an alternative to Zip-Roll where the use of a zipper system is not feasible, its wind and rain protection is provided by the use of two horizontal stabilizers equally spaced along its height and retained at their ends along two deep side rails.

Because its curtain is produced with three independent horizontal panels, each panel can be replaced on demand without having to involve the others.

Product Features

Discrete.

Perfect for both residential and commercial applications, Vista is offered in a powder coated white standard color. Custom frame colors are available upon request.

Beautiful.

Vista comes manual or with standard motor and remote control specifically to create a beautiful see-through view and can be installed on walls with provided brackets, or under a ceiling with designed top slim brackets.

Elegant.

Vista is made of 3 horizontal sections up to 16' in width of transparent or solid color PVC. Vista allows you to enjoy the outdoor view while being protected from the elements.

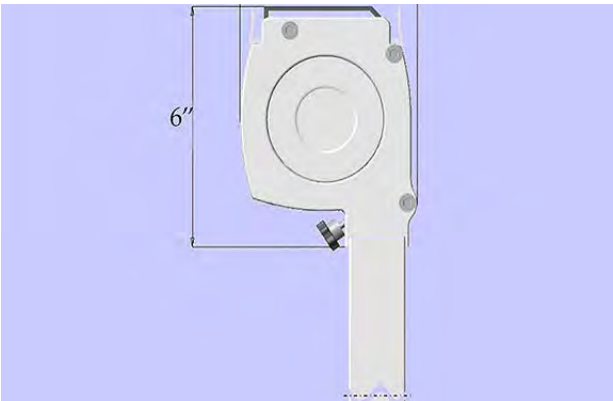

Dependable.

Maximum suggested dimensions of a fully transparent a curtain: 16' wide x 8' high.

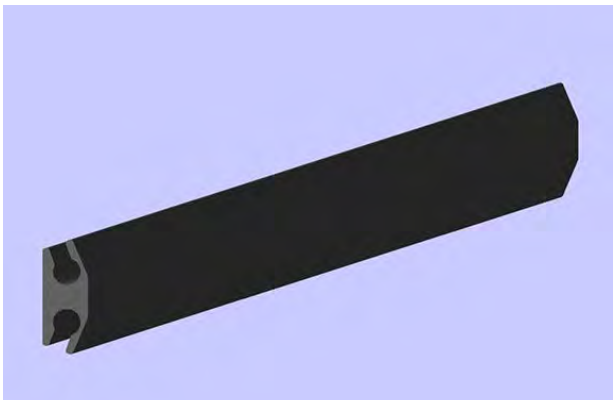

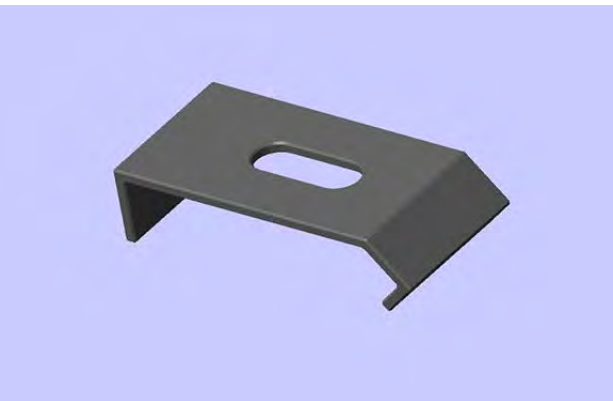

3 independent sections

Elegant top cassette

Discrete windbreaks maintain each sector stretched and wrinkle free

Specially designed ceiling brackets
